

VDGLASS

CRAFTING GLASS STORIES

ABOUT US

At VDGLASS, we bring every idea to life, creating meaningful experiences that embody the essence of your brand through exceptional design.

Driven by a passion for innovation and customization, we seamlessly blend cutting-edge technology with artisan craftsmanship. This commitment allows us to craft **exclusive glassware solutions** that showcase every brand's distinct character.

With over 25 years of expertise, we are skilled in designing and decorating glassware for the **wine, beer, beverage, spirits,** and **coffee** industries, establishing ourselves as a trusted partner in the **B2B** world.

MISSION & VISION

Mission

We guide each client through a **creative and productive journey**, creating glassware that harmonizes premium quality, advanced technology, and artisanal craftsmanship. Our mission is to make every client feel as exceptional as the custom glasses we create. Beyond meeting your needs, we are dedicated to achieving this with a steadfast commitment to **environmental sustainability**.

Vision

Our aim is to become the **key partner in the B2B industry**, delivering innovative and customized glassware solutions that seamlessly reflect brand identity and elevate the customer experience.

OUR PILLARS

Flexibility

Flexibility is the cornerstone of everything we do. We recognize the uniqueness of each customer and adapt swiftly to meet diverse needs, from the large production batch to the individual pallet. Our creative and collaborative approach allows us to create tailor-made solutions and respond promptly to even the most urgent requests.

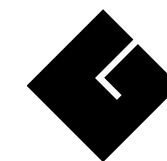

Innovation

Innovation is our passion and our promise. We are dedicated to continuous research and development, supported by our sister company FERMAC, a leader in advanced glass decoration technologies. By staying ahead of market trends, we deliver fresh ideas and cutting-edge solutions that underscore our commitment to excellence

Professionalism

Professionalism defines our relationships and sets us apart. Every project is handled with meticulous care by our team of experts, whose skills and dedication ensure precision and reliability at every stage. With VDGLASS, you can trust that your project is in capable and dependable hands.

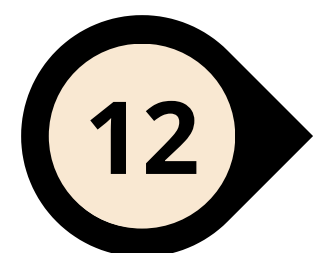

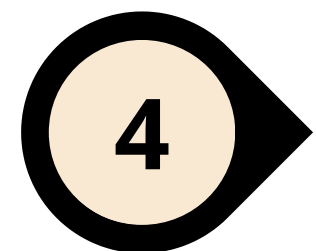

VDGLASS

OUR ORGANIZATION

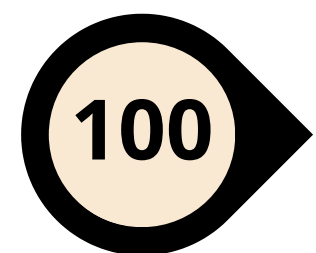

We have 2 production units one in **Parma** and one in **Milan** for a total of:

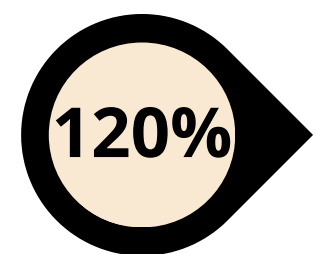

decoration lines

logistic units in Italy

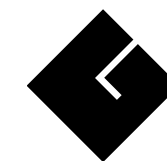

millions pieces decorated in the last 3 years

increase in turnover in the last 10 years

DECORATION TECHNIQUES

Ceramic Screen Printing

Vivid and versatile, our ceramic screen printing offers up to eight colors to create stunning, multi-hued designs. This technique combines creativity and precision, bringing your vision to life with elegance.

Laser

Laser engraving offers a sleek, modern touch for those who value simplicity with a futuristic edge. Whether enhancing the perlage in sparkling wines or the foam in beer, this technique turns every glass into a masterpiece.

Decal

This technique allows for the customization of even the most intricate designs, creating one-of-a-kind pieces that stand out with personality and charm.

DECORATION TECHNIQUES

UV LED Screen Printing

Perfect for vivid colors, UV LED screen printing uses non-toxic, heavy-metal-free organic inks that are as safe for you as they are for the environment. By limiting CO₂ emissions, this process delivers quality without compromise.

Photosensitive and Heat-Sensitive Pigments

For a magical finish, we use organic, non-toxic, heavy metal-free inks. These pigments create extraordinary effects, from glowing fluorescence in the dark to captivating color changes with temperature, adding an element of surprise to every piece.

Precious Metals

Gold, platinum, and intricate details transform glassware into timeless pieces of luxury. These embellishments elevate every creation, adding a refined, jewel-like touch.

DIGITAL PRINTING

A true revolution in decoration, digital printing expands creative possibilities while reducing environmental impact. By using **eco-friendly inks**, we deliver high-quality results without relying on traditional enamels, ensuring a safer and more sustainable approach.

Advantages:

 Reduction of CO2 emissions

 No MOQ

 Wide range of colors and gradients, no need for thermal treatments

 Decoration on irregular surfaces

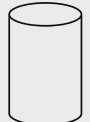

DIGITAL RELIEF DECORATION

Digital relief decoration redefines embossing, offering an innovative alternative to traditional methods that require molds. By using **cutting-edge inkjet technology**, we create intricate **reliefs directly on glass**, elevating design possibilities to new heights.

Advantages:

Reduction of CO2 emissions

No mold cost

Optimized production times

No MOQ

RESEARCH & DEVELOPMENT

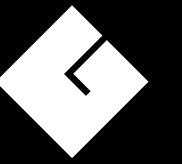

VDGLASS DesignLine products are true works of art, designed to make every sip an extraordinary experience.

Thanks to this distinctive approach, we have gained recognition worldwide, supplying our products to the leading brands in the Beverage industry.

We are talking about **exclusive glassware**, conceived, designed, and crafted in-house to express the values of the companies that trust VDGLASS.

This is not generic customization but **tailor-made products**, capable of creating a genuine and deep connection with those who use them.
